

EXEMPLARY

Fort Leavenworth

Military personnel at Fort Leavenworth in Kansas wanted a way to improve the technological savvy of their buildings while providing visitors with a user-friendly building directory system.

Fort Leavenworth sourced GSA Certified AlivePromo for a multi-unit touch screen, LCD building directory network.

Military Building Directory

During the planning stages, it was discovered that there were other stakeholders that could benefit from a variety of other information sources on the directories. Along with touch enabled personnel listings, a floor map, and wayfinding, the directories feature television, an interactive photo slide show and an upcoming events calendar.

Each building directory is powered by the AlivePromo desktop AirPulse management system, allowing for tenant information to be updated over an internal network within minutes.

Equipment procurement, configuration, networking, creative design and programming were performed by AlivePromo.

Ongoing monitoring and maintenance are performed by AlivePromo from its Minneapolis headquarters.
